New, Rare and Beautiful Plants

FOR 1874.

Abutilon Santana.

As a plant for the decoration of the green-house or conservatory it cannot be surpassed, blooming from October to May; flowers of large size, of dark brownish crimson; distinct and beautiful; darkest sort in cultivation.

Price, 25 cents each; \$2.50 per doz.

Abutilon Thompsonii.

A most beautiful foliage plant, the ground color of the leaf being bright green, blotched, and spotted with yellow.

Price, from 25 to 75 cents each, according to size of plant; small plants grown in 2½ inch pots, \$2.50 per doz.

Achyranthus Aureus Reticulatus.

This is a sport from *Verschaffeltii*, which it resembles, except in the beautiful leaf-markings; instead of being rich crimson, is bright green, marked with yellow; part of the leaf retains the crimson shade of its origin. The stems, which are purplish crimson, form a marked contrast to the prevailing golden shade of the leaves. As a plant for the hanging basket, or a parlor plant, it is very desirable.

Price, 20 cents each; \$1.50 per doz.

Achyranthus Gilsonii.

As a plant for bedding, to use with light foliage, it is much better than the *Coleus*, on account of its hardness; leaves of a dark pink, stems crimson.

Price, 20 cents each; \$1.50 per doz.

Achyranthus Lindenii.

This new and beautiful variety is thus described in English catalogues: "A perennial species from the Equatorial Andes, where it was found at an altitude of 9,000 feet above

sea level. In habit it is dwarf, and completely branched, with narrow, elliptic, lanceolate leaves, of a deep blood-red color, reflecting varying tints of red and purple, and displaying its most attractive features during the later Summer months."

Price, 20 cents each ; \$1.50 per doz.

One of the most useful plants for Summer and Winter bouquets, constantly in bloom ; flowers blue.

Price, 20 cents each ; \$1.50 per doz.
